

# SUPER POLY IMPULSE

## PRODUCT DESCRIPTION

The Audion Super Poly is a handheld impulse heat sealer created for on-site use, allowing freedom of movement around the job. With an adjustable seal timer for sealing a variety of materials, it features a 4.5 metre cord connecting the handset to the control box, with an additional 2.4 metre power cord connecting the control box to the power outlet.

Equipped with upper and lower seal jaws, the Super Poly seals materials including polyethylene, polypropylene, foils, and laminates. The jaw has a spring closure and handle mounted cycle button for convenient operation. The cycle button is pushed to activate the seal. A handset mounted LED light indicates when the sealer is ready or actively sealing.

## PRODUCT FEATURES

- Ideal for use where items must be sealed at their location.
- Strong fibre plastic handle and spring closure jaws.
- Super Poly Transformer Included.
- Electrical requirement 240V.
- 12 month warranty.
- Servicing + spare parts available.
