

P68 MANUAL NET CLIPPING MACHINE

Double Chute
Model

PRODUCT DESCRIPTION

Venhart's Manual Net Clipping Machine P68 allows you to make and fill your own netting bags. The weighed or counted product drops from a hopper or belt into the chute. The machine applies a clip to the top of the filled bag and the bottom of the next. The positioning and angles of the chute are individually adjustable to suit various packing requirements.

The P68 has a stainless steel work table and is available with a single or double chute. Easy foot pedal action applies clips at up to 1300 per hour dependent on operator. Each chute holds approx 60 metres of VENET tubular netting. Two magazines each hold 740 Venhart P68 clips. The P68 Manual Net Clipping Machine is available in standard powder-coated steel finish or full stainless steel finish.

The P68 comes complete with stapling unit, stand, work table, single or double chute (depending on model) and a foot pedal.

PRODUCT FEATURES

- Commonly used for the packing of onions, citrus, and other fruits and vegetables.
- Adjustable table.
- Easy operation and high output.
- Use with Venhart continuous netting and Venhart P68 clips.
- Machine servicing and spare parts available.
- Cone (netting) feeder.

ADDITIONAL OPTIONS *

* Available by special order

- Additional interchangeable chute (for single chute models only). *Seamlessly switch chutes to rotate coloured netting or minimise downtime to reload chute with netting.*
- Please note: a single chute model cannot be converted to a double chute.
