

Mininet citrus bags

CITRUS NETTING

PRODUCT DESCRIPTION

Citrus netting available in Venet Minimesh Citrus Bags, Lightweight Citrus Bags, and Drawstring Citrus Bags. These bags are specially designed for packaging oranges, grapefruit, lemons, and other citrus fruits. Excellent visibility and full ventilation. Extruded from a blend of linear low density polythene (LDPE) for stretchability and high density polythene (HDPE) and linear low density (LLD) polymers for strength.

- Minimesh Citrus Bags are made from fine but strong filaments with a strong sewn bottom.
- Lightweight Citrus Bags offer a large mesh design made from thick filaments with a strong sewn bottom, suitable for grapefruit and large navel oranges.
- Drawstring Citrus Bags feature a handy built-in drawstring, eliminating the need for clips or ties with a thermo-welded bottom.

Venhart net clips also available to seal net bags.
