M2219	SUPER 6	2,000	19mm o/f seals with indentations, 19mm x 28mm x 0.5mm

Seals for Steel Strapping

PRODUCT DESCRIPTION

Snap-on seals for steel strapping are used with standard steel strapping tools such as crimpers. These seals can be clipped onto the strap, removing the need to pre-thread and as a result, speeding up the strapping process.

The seal is placed over the two overlapping straps during or after tensioning the metal strapping. A strapping tool is then used to clamp the seal tightly around the straps and fasten it closed.

PRODUCT FEATURES

- Available in three sizes to suit 12, 16 & 19mm strapping.
- Snap-on design speeds up the strapping operation.
- Quick and easy application.

Knockdown Buckles for Stainless Steel Strapping

PRODUCT DESCRIPTION

Stainless steel (SS) knockdown buckles are ideal for securing stainless steel strapping. They are most often used for securing objects outdoors, such as bins and signage. The knockdown flaps provide a locking mechanism to ensure reliability and durability.

PRODUCT FEATURES

- SS Stainless steel knockdown buckle for use with Spinnox-B tool.
- Suitable for securing objects inside or outside, bundling packages, and reinforcing straps.
- Durable, and resistance to rust, weathering and corrosion.
- Sold in packs of 100.
- Available in a range of sizes.
