

Venus[®]

FOOD WRAP DISPENSER

TECHNICAL INFORMATION

VH451

PRODUCT DESCRIPTION

The Venus 451 Food Wrap Dispenser is your go-to solution for securely wrapping and displaying fresh produce, meat and bakery items. It's cheap to run and easy to store making it an economical option for your food wrapping needs. The stainless steel preparation tray allows for easy cleaning and maintenance. It features a safety guard that conceals the Teflon coated hot cutting bar to reduce the risk of accidental burns. The adjustable temperature control warming plate creates tightly sealed packages, locking in freshness.

Achieving the perfect wrap using the VH451 is simple - Place the product on the preparation tray and pull the film tightly over the product. Make sure the product is properly covered before pressing the film over the safety guard to expose it to the hot cutting bar. After the film edges are tucked under the product, briefly place it on the warming plate to seal it off.
